Summary

AI-focused engineer with proven shipping experience on 4 production systems serving 100+ users. Expert in Python (preferred language) with strong fundamentals in DSA, OOPs, DBMS, and OS basics. Currently building AI-powered systems with generative AI and LLM integration demonstrating AI-first mindset. Proficient in SDLC and Agile/Scrum methodologies with ownership mindset and strong problem-solving capability. TCS CodeVita Global Rank 9658 among 300,000+ (Top 3-4%) with 200+ competitive programming problems showcasing analytical thinking. Strong communication skills and willingness to learn emerging technologies. Ready to contribute to AI-enabled applications, cloud-native architectures, and intelligent automation systems. .

Education

Parul University , Vadodara, India	2023 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.16 (81.6%) — No Backlogs
Sri Chaitanya Junior College , BIEAP	2023
Class XII (Intermediate)	96.1%
St. Ann's Convent School , ICSE	2021
Class X	73.33%

Skills

Languages: Python (Expert) , Java , JavaScript , C , SQL

Core CS: Data Structures & Algorithms , Object-Oriented Programming , DBMS , OS Fundamentals

AI/Generative AI: LLM APIs , RAG , Generative AI , Automation , AI Applications

Application Development: REST APIs , Microservices , Cloud-Native Architecture , Database Optimization

Cloud: Azure (learning) , Cloud Deployment , Infrastructure Basics

Data & Analytics: Data Pipeline , ETL , SQL Optimization , Analytics Platforms

Methodology: SDLC , Agile/Scrum , Problem-Solving , Ownership Mindset

Tools: Git , GitHub , VS Code , Linux , Postman

Projects

AI Placement Agent — AI-Enabled Intelligent Automation (In Progress) 🐙 — *Python, FastAPI, LLM APIs, RAG, Generative AI, PostgreSQL, Automation*

- Building AI-first application demonstrating generative AI integration. Implemented LLM APIs and RAG for intelligent automation and AI-driven decision making. Shows hands-on AI/GenAI experience.
- Designed REST API architecture and database systems for AI-enabled features. Demonstrates cloud-native thinking and automation using emerging technologies.

CivicConnect — Data-Driven Intelligent Platform 🐙 — *Python, Node.js, PostgreSQL, Data Pipeline, SQL, APIs*

- Built end-to-end data pipeline and analytics platform using Python and SQL. Demonstrates DBMS expertise and data-driven system design for intelligent applications.
- Implemented REST APIs and microservices architecture. Shows SDLC proficiency and Agile development practices.

EduTrack — Production Web Application 🐙 — *Python, REST APIs, PostgreSQL, DBMS, OOPs*

- Production system serving 100+ users demonstrating shipping capability and ownership mindset. Built using Python with strong OOPs principles and DBMS optimization.
- Demonstrates problem-solving ability and willingness to learn and iterate on real-world systems.

Achievements

TCS CodeVita Season 13 — Global Rank 9658 among 300,000+ participants

Palo Alto Networks — Cybersecurity Foundation

NPTEL — Cryptography in Cyber Security (IIT)

Competitive Programming & Achievements

LeetCode: 160+ problems 📁

HackerRank: SQL 3-Star 📁
